Session 2- The Advent of Composite Cement- Opportunities and Challenges for users and manufacturers

Session Synopsis: With depleting lime stone reserves, composite cement (made by either mixing flyash or slag) by now has made a strong foothold in the Indian construction. The Bureau of Indian Standards (BIS) has recently published a Standard on Composite Cement (IS 16415).

It is a good opportunity for the cement companies to make good quality composite cement. In this session, the experts will discuss the various opportunities and challenges for the producers, users and other stake holders on the subject.

Session Topics:

- Challenges in manufacturing composite cement
- Carbon footprint of composite cement
- Opportunities and applications of composite cement
- Benefits of composite cement over blended cement
- Current scenario of composite cement in developed countries
